

# GMK6400

**The most powerful 6 axle crane on the market**

## Key features

- 400 t capacity
- 60 m boom
- 79 m luffing jib / 64 m fixed jib
- 135 t counterweight
- 405 kW Tier 3/4i engine
- 12 x 8 x 12

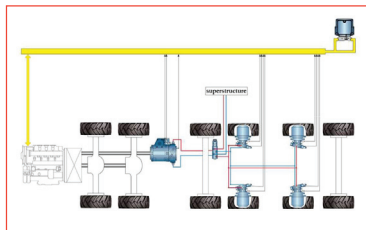

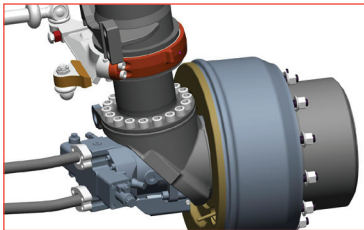

## Key Benefits

### 1 Strongest 6 axle crane overall

- 60 t @ 60 m main boom with MWL
- 8 t @ 136 m hook height with 79 m luffing jib
- Up to 60% load chart increase with MWL

### 2 Innovative

- MEGADRIVE™ – hydrostatic driven axles for maximum traction and excellent creeping capabilities

- Hydraulic motor concept for crane functions with less fuel consumption in combination with the Fuel-Saver option
- New glass-fibre aluminium composite drivers cabin with optimised ergonomics & visibility

### 3 Efficient

- Self-rigging MWL with one single lift and self rigging auxiliary hoist – no auxiliary crane needed!
- Symmetric 10 t counterweight slabs which can be used on left and right side for improved transport logistics
- Jib sections optimised for transport – section within section transport possible
- New MMI (Man Machine Interface) for outrigger and suspension controls → faster crane set-up

### 4 Flexible

- 5 outrigger base settings for narrow site conditions
- All-wheel steer which allows moving on site with up to 95 t of counterweight
- Patented MEGATRAK™ suspension

### 5 New standard equipment

- Outrigger pressure monitoring system
- Working range limiter
- Air conditioning in both cabins
- Reversing & hoist camera systems
